WEATHER INFO: Winds-> 17.8 mph @ 176, 17.3 C, 23.2% RH, 611.7 Torr, clear

ARO 12-Meter Recommissioning:

1. Tom, Nick, Kevin, Sean, Mike, Bob, Martin and Mark are on site.

2. Sean applied a 3rd and final round of grease to the az bearing.

3. We made some more measurements of the concentricity of the az-encoder shaft.

4. Sean is taking the waste-oil barrel downtown for disposal.

5. Kevin continued scraping paint and rust off the pedestal labyrinth.

6. We reinstalled the AZ encoder.

7. We succeeded in moving the dish in azimuth under its own power using both the ACU and the PCU.

8. First efforts at initializing the az encoder failed. Troubleshooting continues.

8. Removed Snow-plow blade from Chevy Pick-up for summer time use.
