MEMORANDUM

To: All SMTO Personnel.
From: Thomas Folkers
Date: January 31, 2001
Subject: JT-System Installation at the SMT.

Over the next few months, Jack Cochran will be making the necessary preparations to install the JT system on the Heinrich Hertz Telescope. These preparations will involve many activities from mechanical, cryogenic and electrical. This is a very exciting project and one that has long been needed at the telescope.

In any small organization such as ours, it is imperative that everyone pitches in to support this effort. Jack can not do it alone. I expect the Site Supervisors, Telescope Mechanic and others to help out in whatever way possible. Many are already doing so. These tasks could include providing an extra set of hands when needed, helping design mounting fixtures or even installing cryo lines and compressors. It is only with this help that this project will be completed in a timely manner.

Thank you in advance for your help.

Thomas W. Folkers
